

Benchmark of Quality and Performance

Unrivaled precision. Universal compatibility.

Most Widely Used Precision Grader

The Level Best Dual Mast PD Series is made specifically to work with skid steer loaders. Plus, we've made it easier to create an extremely precise, smooth finished grade. Level Best grading boxes represent the next level in technology advancement.

3-D Precision Grading Made Easy

The Level Best PD Series works seamlessly with the on-site horizontal laser reference, and uses highly accurate satellite measurements for vertical reference points. It's ready to use with GPS, total stations or sonic technology for complex contour work.

Over 50 Adjustments Per Second

Operators are far more comfortable with the smoothest operation available, from dead-level to contoured surfaces.

High Production Push-Pull Operation

Skid steer loaders work in a completely different way than tractors. That's why we designed the Level Best PD Series to take advantage of the push-pull directional work style of skid steer loaders for maximum production.

Made For Operator Comfort

Happy operators are more productive. The unique frame design gives operators exceptional control, efficiency and smoothness, and eliminates the "bounce" effect common in skid steer loaders due to the short wheelbase.

- The industry's only Precision Box Grader accurate to 0.1" of spec
- Mix & Match universal compatibility with all power and guidance systems
- No daily maintenance - helps maximize profitable uptime
- Faster to achieve a consistently smooth, highly accurate grade
- One of the most flexible and productive attachments available

When "close enough" simply isn't good enough, make it Level Best Precision Grading

About The Level Best PD & PS Series

Designed for Compact Track Loaders and Skid Steers

Skid steer loaders work differently than tractors, in both directions. So we engineered the Level Best PD Series to take advantage of the push-pull work style of skid steer loaders for maximum production.

In short, the Level Best PD Series is made specifically for skid steer loaders, and is not a design compromise that attempts to work on both skid steers and tractors.

The unique frame design gives operators exceptional control, efficiency and smoothness, and eliminates the "bounce" effect common in skid steer loaders due to the short wheelbase.

Grades in both directions to help optimize productivity
